Junior Achievement of Greater Miami,
Miami EdTech, Dora's Bistro

For the kids it is eye opening; they begin to learn the actual value of money when they earn it, and also begin to understand what is the difference between attending school and going to work. For companies, the important part of the program is to exercise social responsibility, providing opportunities for the interns to be formed in a well round environment.

Exposing students with special needs to real-life work experiences not only enhances the person with special needs but provides opportunities for fellow employees to develop compassion and understanding. It's a win win for all.

I believe the program serves two purposes. One gives student an insight into the world of work and second it provides companies with the opportunity of hiring some of these students when they graduate.

This is a great program for students to really learn about the workforce and the industry as a whole, it allows them to figure out what they really do or do not want to do in life.

A strength would be that high school students are given an opportunity to intern, learn about the workplace, and grow through this experience.

This experience has far exceeded my expectations as an employer. Unfortunately, we lost a vast number of clients as a result of the pandemic. Grace offered a fresh, young perspective on establishing new clientele by utilizing her computer networking skills and promoting our business via different social media outlets such as Facebook and Instagram. As a result of her efforts, we have experienced a significant increase in new clientele. Overall... a true success for both employer and intern.

Eduardo's Unisex Salon*

My company was happy to host interns. Due to their feedback, we were able to refine our product and our next iteration will be for us to start selling our products. We have grown as much or even more

than the interns. We are so honored to have hosted them.

I would like to express our deepest gratitude and appreciation for having our daughter partake in this wonderful program. There is nothing greater than a parent's desire for their child to grow up to become a well-rounded, whole-hearted individual. This program has allowed her to gain confidence in her art, communicate through her art, and build social skills. She constantly came home with enjoyable stories not like coming back from a job but more like a summer camp. All this was taking place while she learned and worked. It has taught her the value of making an honest living from something she loves. From the bottom of our hearts, THANK YOU!

Lazaro and Mayflor Remond, Parents

Altogether, I thoroughly enjoyed the internship experience which allowed me to experience working in a nurturing yet professional environment. I believe this internship has contributed to my gradual but promising entrance into the work force and has provided me with a

better understanding of what career I'd like to pursue in the future.

*Amanda Rodriguez, Intern

Hialeah Gardens

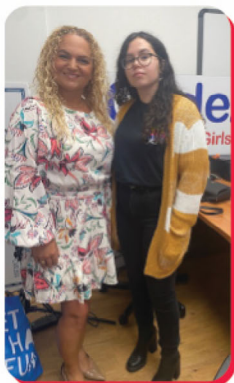

The internship experience was challenging, but different than anything I have ever done. It pushed me out of my comfort zone and showed me the opportunities present.

The internship experience was really fun and eye opening as I got to try new things along with improving on the skills which I already had.

The experience I have gained throughout the internship was very useful, I get to familiarize myself in a work environment as well as learn how to be cooperative and be a leader in certain situations.

The internship is a perfect place to get experience and it helps you set goals and guides us to the right path.

I believe the Internship experience was a great experience to have. It taught me what it is to work; and time management. I was pleased.

I'm glad I was a part of this summer internship experience. This internship has not only increased my experience of working in the technology field but also broadened my knowledge of the field itself.
